A PARTNER IN HEALTHCARE FOR OVER 80 YEARS

Every day, in medical and medical centers, thousands of objects—from portable resuscitation equipment to laundry carts—must be moved to their point of use. Actually, all of us are using a wide range of casters, often without noticing, that allow movement to take place quietly, reliably and safely. Darcor is one of the world's leading manufacturers of these casters, bringing over 80 years of experience to helping the needs of hospitals and other healthcare facilities.

Darcor is recognized as the leading authority on solving replacement caster problems, based on our successes in institutions around the world. We work closely with our customers, including hospitals and original equipment manufacturers, to solve real-world problems that not only satisfy, but revolutionize. Over the years, we have built strong partnerships with many leading healthcare institutions and Fortune 500 companies.

Delivering value, quality and reliability at every turn.

Our business is based on consistently delivering value, quality and reliability. We recognize the social needs of hospital operating and have designed products that satisfy them with precision. We work closely with many of the world’s leading manufacturers of sensitive equipment and have specified our casters to the healthcare market. We are experts at solving caster problems that literally shock, vibration and noise—critical factors in many hospital operating rooms. We develop casters that move sensitive diagnostic equipment, such as MRI’s and portable ultrasound machines.

We design to complement our customers’ machinery, using any finish or color. We offer a variety of coating options, including powder coating. We can provide corrosion-resistant casters for diagnostic and medical equipment and laundry and housekeeping applications, as well as easy-to-use brake-and-swivel-locking casters for beds. We work closely with our medical equipment customer, designing new ones, to meet the most demanding healthcare applications.
SPECIAL FORMULATED
MANY OF DARCOR’S MOTION SOLUTIONS ARE BASED ON TWO REVOLUTIONARY CORE PRODUCTS:

THE NEOPRENE WHEEL

Ideal for most hospital applications, the Darcor Neoprene Wheel is quiet and easy to roll over all surfaces, including carpet, linoleum and floor tiles. It will not mark or stain surfaces, is virtually cut-proof, and resists commonly used chemicals and cleaning compounds. Its effortless swiveling and smooth ride have redefined the function of casters in institutional applications.

THE SOLID ELASTOMER (SE) WHEEL

The Darcor Solid Elastomer Wheel is the industry leader in applications demanding low rolling resistance for heavier loads. It requires only 20 lbs. of effort to move a one-ton load, and only 10 lbs. to keep it moving. The SE Wheel provides excellent shock-absorption properties, is highly durable and is able to withstand harsh chemicals and extreme temperatures.

Darcor manufactures a complete line of high-quality, ergonomically designed products that meet high standards in strength, reliability and longevity.

INNOVATORS IN MOTION TECHNOLOGY

A full range of caster models for every hospital application.

MEDICAL CASTORS

Darcor manufactures a complete line of high-quality, ergonomically designed products that meet high standards in strength, reliability and longevity.

• Bedside and Overbed Tables
• IR Stands
• O.R. Equipment
• Other sizes (16"
• Valances
• Normal 5" Casters
• M200 Series
• Medical Carts
• Hospital Food Coolers
• Patient Ultrasound Machines
• Gastric Carts
• Kitchen Equipment
• Concealed Casters (With Skid Mount)
• Reagent Carts
• Kitchen Ray Trays
• Coated Casters
• Portable X-Ray Equipment
• Medical Foot Stools
• Housekeeping Carts
• Laundry Trolleys
• Maintenance Carts
• Patient Transfer Equipment

APL/M6 SERIES

The Darcor APL and M6 incorporates an advanced caster design and central locking mechanism that makes it an excellent choice for transporting the most sensitive diagnostic equipment. It can be custom-configured to meet your precise specifications.
Specially formulated.

Many of Darcor's motion solutions are based on two revolutionary core products:

**The Neoprene Wheel**

Ideal for most hospital applications, the Darcor Neoprene Wheel is quiet and easy to roll over all surfaces, including carpet, linoleum and floor tiles. It will not mark or stain surfaces, is virtually tear-proof, and resists commonly used chemicals and cleaning compounds. Its effortless swiveling and smooth ride have redefined the function of casters in institutional applications.

**THE SOLID ELASTOMER (SE) WHEEL**

The Darcor Solid Elastomer Wheel is the industry leader in applications demanding low rolling resistance for heavier loads. It requires only 20 lbs. of effort to move a one-ton load, and only 10 lbs. to keep it moving. The SE Wheel provides excellent shock-absorption properties, is highly durable and is able to withstand harsh chemicals and extreme temperatures.

Darcor manufactures a complete line of high-quality, ergonomically designed products that meet high standards in strength, reliability and longevity.
**APPLICATIONS**

At Darcor, we understand that every workplace is different, yet many share certain common requirements. We have set the pace of innovation by establishing industry application standards on four continents.

**Food Service / Supply**

Highly mobile casters with quiet, shock absorbing wheels are ideal for moving supply carts through hallways and over elevator gaps. Cartwashable™ casters with sealed, greaseable assemblies ease the burden on maintenance departments while allowing the whole cart to be sanitized regularly.

**Medical Diagnostic**

On some of the most critical and expensive equipment in a hospital, manufacturers specify Darcor casters. Ease of brake engagement and maximum mobility are built into all Darcor twin-wheel casters. Our uniquely designed casters isolate shock, vibration and noise, and are quality engineered for maximum strength, performance, and durability.

**Hospital Beds**

Equipped with our neoprene wheel, Darcor’s bed casters will not flat spot after sitting for extended periods. Unique brake designs, accessible from any angle, also characterize our bed caster line.

**Laundry and Housekeeping**

Darcor’s neoprene will roll easily on the wide range of flooring found in institutions and will withstand the harsh chemicals associated with keeping these areas clean. A toe-activated 4-position swivel lock will allow workers to maintain control over loaded laundry carts while moving quietly down corridors.

**A PARTNER IN HEALTHCARE FOR OVER 80 YEARS**

Every day in every hospital and medical center, thousands of objects – from portable resuscitation equipment to laundry carts – must be moved to their point of use.

As one of the few companies remaining in the field, offering casters that allow movement in tight spaces quietly, reliably and safely, Darcor is one of the world’s leading manufacturers of these casters, bringing over 80 years of expertise to meeting the needs of hospitals and other healthcare facilities.

In fact, we are recognized as the leading authority on solving replacement caster problems, based on our successes in institutions around the world. We work closely with our customers, including hospitals and original equipment manufacturers, to find world-class innovations that not only satisfy, but exceed, their needs. Over the years, we have built strong partnerships with many leading healthcare institutions and Fortune 500 companies.

Delivering value, quality and reliability at every turn.

Our business is based on consistently delivering value, quality and reliability. We recognize the social needs of hospital operators and have designed products that satisfy these with precision.

We work closely with many of the largest and most respected hospitals and institutions to bring our expertise to the healthcare market. We are experts at solving caster issues that involve shock, vibration and noise. We have seen the hospital industry move from manual to motorized casters, to the recognition of the value of casters in general and Darcor’s unique quality in particular.

We can design to complement our customers’ machinery, using any finish or color. We offer a variety of plating options, including powder coating. We can provide corrosion-resistant casters for diagnostic equipment and delay and laundry applications, as well as easy-to-use brake and swivel-locking casters for beds. And we can adapt our existing caster models, or design new ones, to meet the most demanding healthcare applications.

**ISO 9001 REGISTERED**
